

We are excited that you are considering registering for the GRP certification! We strive to create an easy and stress-free enrollment process. To create a great experience for all who are enrolling we have created a list of information you will need for the enrollment process.

We will ask for:

- Equipment maintenance records (template available)
- Lighting used for your farming operation along with type and wattage (Lights in office, shop, barn, exc.)
- Production plan (Template available)

If Applicable

- Soil Health sample data (not required for initial registration)
- Irrigation information such as type, energy source, pump efficiency, and piping size/ fittings.
- Grain Drying information such as type of drying system, energy usage and cost, and drying statistics (bushels and percentage dried).
- Livestock water system information including type of tank, energy usage, number of livestock using a unit.

With all this information in hand, your enrollment process will be quick and easy! Just simply enter the information that you have already collected, answer a few yes or no questions, and send it to us to do the rest! We look forward to you joining GRP as a certified grower!

Please note registration can be started before all the information is gathered. Your registration progress will be saved and can be returned to at a later point in time.

Please follow the link below to start the registration process.
